August 11, 1981

Public Notice 14039-E48 (U.S. Navy)  
Proposed dredging, Alameda Naval Air Station, Alameda County.

Dear Colonel Bazilwich:

The State agencies listed below reviewed this public notice and provided comments. The Resources Agency concurs in these findings.

The Department of Fish and Game (DFG) comments that the public notice does not indicate how the California least tern nesting area at this site will be protected. To ensure that no adverse impacts occur to the major feeding area for this least tern colony, DFG requests that the Corps permit include the following conditions:

1. All dredging will be done between August 15 and May 1.
2. The least tern nesting site will not be impacted in any way.

Questions concerning these comments should be directed to Paul Kelly, DFG, 1155 Sanders, Moraga, CA 94556 or (415) 376-8892.

The San Francisco Bay Commission (BCDC) has jurisdiction over this project but has not received a consistency determination for the proposed work. BCDC asks, therefore, that the Corps hold its permit in abeyance until a BCDC Letter of Agreement is issued.

The San Francisco Bay Regional Water Quality Control Board waives certification for this work.

Given the above discussion, the State requests that the Corps hold its permit in abeyance. If a Letter of Agreement is issued by BCDC, the State would not object to issuance of a Corps permit, if the DFG conditions are included.

Sincerely,

*Charles W. Burns*

for JAMES W. BURNS

Assistant Secretary for Resources
